

GOLF CLUB RACK FOR MOTORCYCLE

ABSTRACT OF THE INVENTION

A golf club rack for a motorcycle comprises a mounting plate that is removably mounted on existing holes in the side of a motorcycle fender and a cradle that is removably attachable to the mounting plate. The cradle has a bottom and upwardly extending sides that hold the golf clubs upright, preferably inclined inwardly, at the side of the motorcycle. The cradle preferably is attached to the mounting plate by a releasable mounting mechanism held in place by a single threaded fastener. Desirably, the mounting mechanism includes a mounting bracket on the cradle that is bolted on a mounting block on the mounting plate.
